

HSQE & Assurance

Health & Safety at Wynnwith

Wynnwith understand that working in a safety critical environment generates huge responsibilities and it is imperative to have the right team, systems and culture in place to deliver our service safely. Wynnwith's integrated management system ensures our delivery exceeds the requirements outlined in statutory legislation, Link-up modules, industry and client standards.

Bespoke Service

Wynnwith have invested heavily in developing a unique software package and tailored procedures that ensure we consistently deliver high standards. Our Company is totally committed to protecting the safety interests of our employees, clients and all third parties.

- Wynnwith operate a bespoke database with supporting procedures, which ensures a highly refined and unique service.
- Our integrated management system logs and tracks candidate competencies, controls safety critical working hours and records all interaction.
- The Rail Compliance Department responds to and communicates all changes to industry standards.
- Health and safety advice is also readily available if required, including a 24 hour On Call Management Team.
- Asset management is an essential part of the overall service provided.
- All workers are subject to ongoing health checks and where necessary, Health and Safety Surveillance.
- We work closely with each client on all safety matters and provide risk management support that allows effective implementation of risk control measures.

Delivery

Wynnwith pride themselves on their continued ability to meet and exceed high Health & Safety standards. Our Company proves their ability through ongoing certified, client and internal audits. Moving into our fourth decade of trading in the technical and engineering industries we have established many long standing business relationships with a number of market leading organisations.
